———, **Ishihara, T.,** and **Hamada, T.** Chromosomal alteration and development of tumors. III. Change in ploidy of the stemline chromosomes in a mouse sarcoma in connection with a transplantability shift 55

———, and **Hirumi, H.** Cytological study on the effects of β-azaguanine and related compounds on the Yoshida sarcoma cells 345

SUBJECT INDEX

Acetal phosphatide, choline-containing, in rat liver 1

Acetylcholinesterase, paper electrophoretic studies 249

Acylase, in liver during DAB feeding 235, 243

———, paper electrophoretic studies 243

Aminoazo dyes, dye-bound proteins from liver after feeding 113

———, effect on acylase 235

———, effect on acetylcholinesterase 249

———, effect on liver enzymes..... 255

———, carcinogenesis 265

Autoradiography, of epidermal tumors... 105

———, of chemically induced fibrosarcoma 147

Ascites hepatoma, nitrogen mustard N-oxide resistant subline 179

———, radiosensitivity.....33

β-Azaguanine, cytological effect on sarcoma cells 345

Basic protein, from tumor tissues 223

Catalase, during 3′Me-DAB administration 255

———, influence of hypophyseal factors on activity of 17

———, effect of hypophysectomy 27

———, in liver during development..... 231

Choline-esterase, effect o RC4..... 187

Choline plasmalogen, in umor tissue 11

Chemotherapeutic test, using pulmonary tumor formation by intravenous injection of cancer cells..... 335

Chromosomes, in gastric carcinoma treated with carzinophilin.....44

———, alteration and transplantability shift 55

Cigarette tar, chemical analysis 97

DAB, see aminoazo dye.

Demethylase, N-, during 3′Me-DAB administration 255

Desoxyribonucleic Acid, in human uterine cancer 371

4-Dimethylaminoazobenzene, see Aminoazo dye.

Diphosphopyridine nucleotide, effect on carcinogenesis 265

Drosophila, melanotic tumor formation... 377

Ehrlich ascites carcinoma, biochemical action of RC4 187

———, zinc metabolism 156

Electronic structure, in relation to carcinogenic activity.....67, 119

———, of 4-nitroquinoline N-oxide, etc.... 119

Electronmicroscopy, chemically induced fibrosarcoma 147

Flavin enzymes, in liver during DAB feeding..... 153

Gastric cancer, histology and age factor... 273

β-Glucuronidase, during development ... 231

Glycolysis, effect of RC4.....187, 285

Hematological effect, of 6-carboxy-1-nitroquinoline N-oxide 341

Hematophorphyrin, 203 Hg-, behavior in tumor bearing mice 156

Hexokinase, effect of RC4 187

Histochemistry, epidermal tumors 105

Hypophyseal factors, influence on liver catalase 17

Hypophysectomy, effect on liver catalase...27

Iron metabolism, effect of toxohormone... 213

Isonicotinic acid hydrazid, induction of lung tumors 83

———, effect on hepatocarcinogenesis 91

Melanotic tumor, in Drosophila, ... 377

Metals, in relation to melanotic tumor

formation in Drosophila 377
Methylcholanthrene, carcinogenesis 265
———, summation effect with 4-nitroquinoline N-oxide 125
Microspectrophotometry, DNA in uterine cancer 371
Mitosis promoting substance, see Oncotrephin.
Nicotinamide, effect on carcinogenesis ... 265
Nitrogen mustard N-oxide, resistant subline of ascites hepatoma to,..... 179
4-Nitroquinoline N-oxide, 6-carboxy-, hematological effect 341
———, relation between electronic structure and carcinogenic activity 119
———, summation effect with methylcholanthrene..... 119
———, skin carcinogenesis with a single application 139
Oncotrephin, electrophoretic analysis 201
———, like substance from regenerating liver 207
———, enzymic and acid hydrolysis .....
Osteogenic sarcoma, histogenesis 399
Phosphatase, effect of RC4..... 187
Plasama iron, during development of mouse 231
Polar dye, incorporation of N-methyl carbon into..... 383
———, reductive decomposition 389
———, heterogeneity 389
———, fractions 389
Protein binding, of aminoazo dyes ...371, 389
Protein-bound dye, in liver during 3'Me-DAB administration 255
Pulmonary tumors, induction with isonicotinic acid hydrazid 83
———, formation by intravenous injection of cancer cells 335
Radiosensitivity, difference among strains of ascites hepatoma of the rat 33
RC4, mode of action 187, 285, 301
———, structural changes in aqueous solution 301
Respiration, effect of RC4 187
Streptococci extract, Streptolysin-S synthesising and anticancer activities 309
Streptolysin-S, synthesis by Streptococci extract 309
Thiobarbituric acid, substance reacting with, in rat liver..... 1
Toxohormone, effect on iron metabolism 213
———, from tnmor tissues 223
Transplantability, in relation to chromosome alteration 55
Ultraviolet microscopy, of living Yoshida sarcoma cells 169
Xanthine oxidase, during 3'Me-DAB administration 255
X-radiation, effect on ascites tumors 33
Yoshida sarcoma, ultraviolet microscopical studies 169
Zinc metabolism, in tumor..... 156
^{63}**Zn-hematoporphyrin,** behavior in tumor-bearing mice..... 156
